

Whole-network form and local confluence geometry

a Elongated / tributary-rich
Whole network · station 03030852

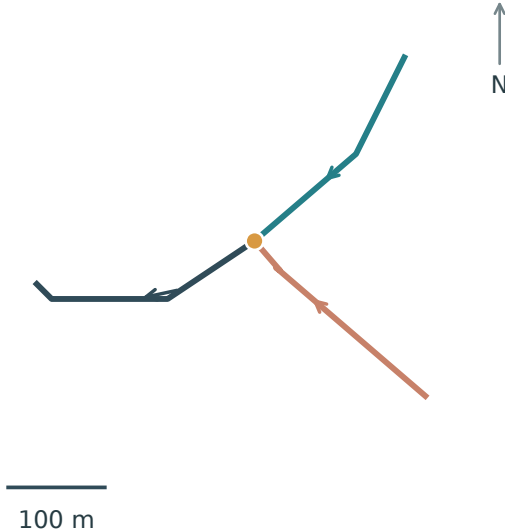

b Sparse / mainstem-dominated
Whole network · station 06893990

c Broad / tributary-rich
Whole network · station 07099200

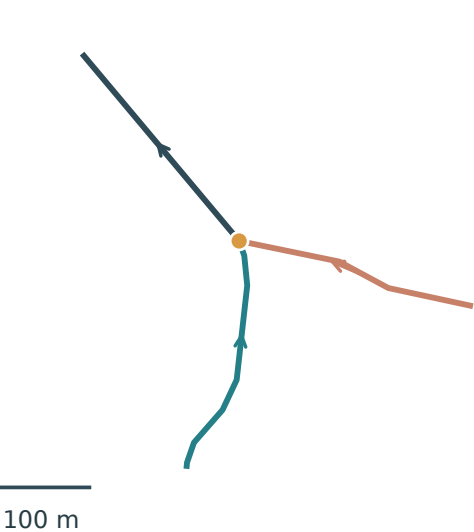

d Its actual selected junction · 250 m

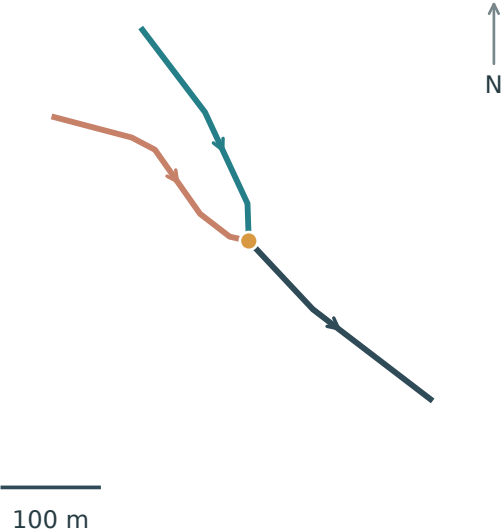

Incoming angle 93.0°
Downstream sinuosity 1.088

e Its actual selected junction · 250 m

Incoming angle 87.5°
Downstream sinuosity 1.000

f Its actual selected junction · 250 m

Incoming angle 30.8°
Downstream sinuosity 1.003

Top: original real network representatives, independent physical extents. Bottom: exact 250 m mapped centreline windows.
Gold star: selected junction. Below: teal/coral incoming branches, dark downstream channel, flow arrows. Representatives selected without DOC.
