

How much monthly DOC information does river morphology add?

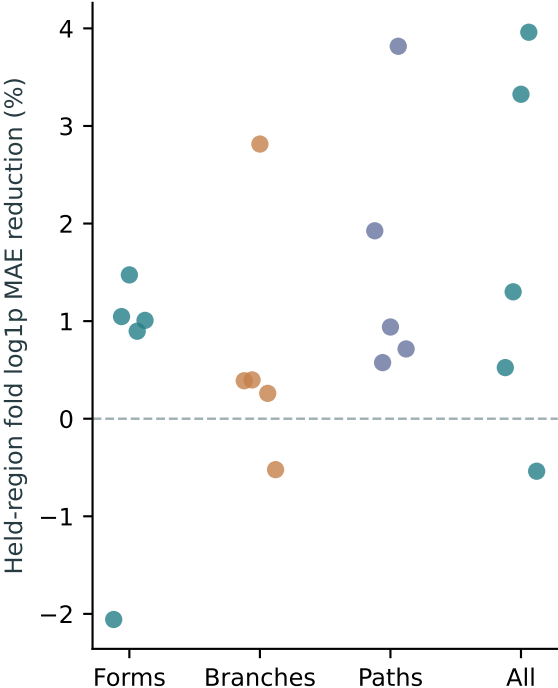

a Same stations and months

b Additional morphology information

c Five geographic folds

297 source-role stations / 62 HUC4 / 18,688 observed months; HUC4-held folds, station-equal fitting and scoring.
Morphology blocks separately augment the hydro baseline. a/b: HUC4 bootstrap 95%; c: one point/fold. Linear diagnostics, not released-model gains.
