

The river footprint actually connected by DOC monitors

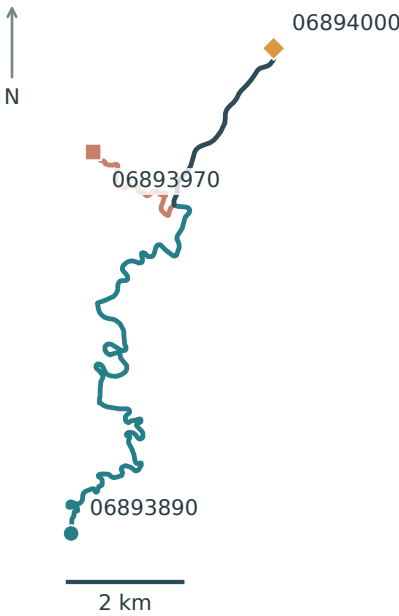

Independent A Independent B Shared downstream trunk

a Lower branch dispersion · lower common share

Branch A 76.8 km · B 23.8 km · common trunk 43.0 km
Independent-branch CV 0.248 · common share 37.9%

b Higher branch dispersion · lower common share

Branch A 12.5 km · B 2.7 km · common trunk 3.5 km
Independent-branch CV 0.370 · common share 24.6%

c Lower branch dispersion · higher common share

Branch A 28.5 km · B 2.5 km · common trunk 54.3 km
Independent-branch CV 0.132 · common share 66.0%

d Higher branch dispersion · higher common share

Branch A 120.3 km · B 8.6 km · common trunk 162.3 km
Independent-branch CV 0.650 · common share 66.5%

Actual NHDPlus channels in EPSG:5070, cropped at station linear measures; independent scale bars, grid north up.
Four geometry-selected examples from 59 connections, not new classes. Higher/lower common share refers to its fraction of the mean path.
