

Actually monitored tributaries and receiving DOC

a Elongated
06892350 · area coverage 97%

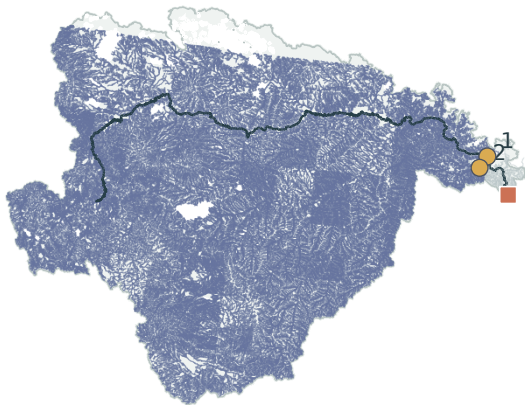

100 km

b Mainstem dominated
401733105392404 · area coverage 75%

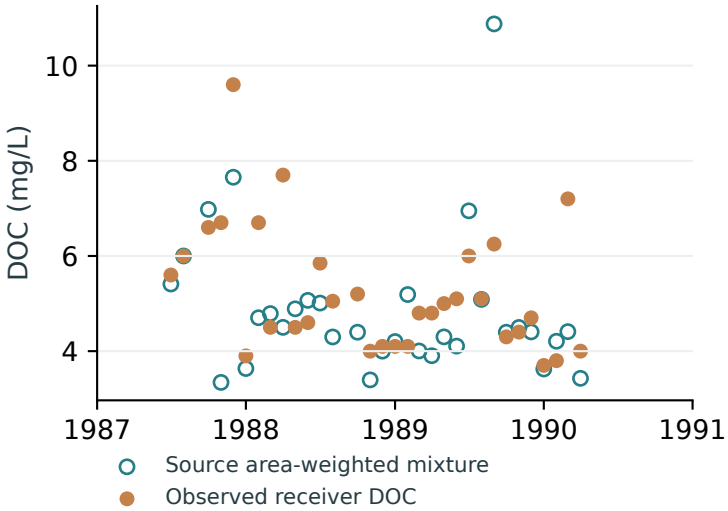

0.5 km

c Broad
06342500 · area coverage 99%

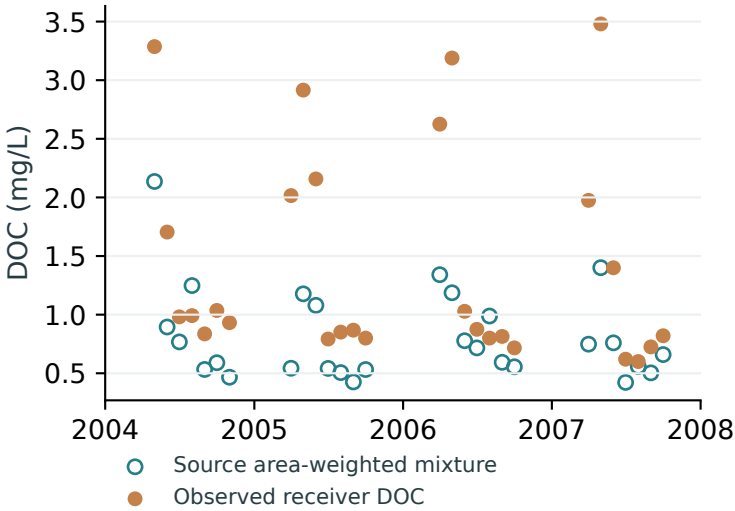

200 km

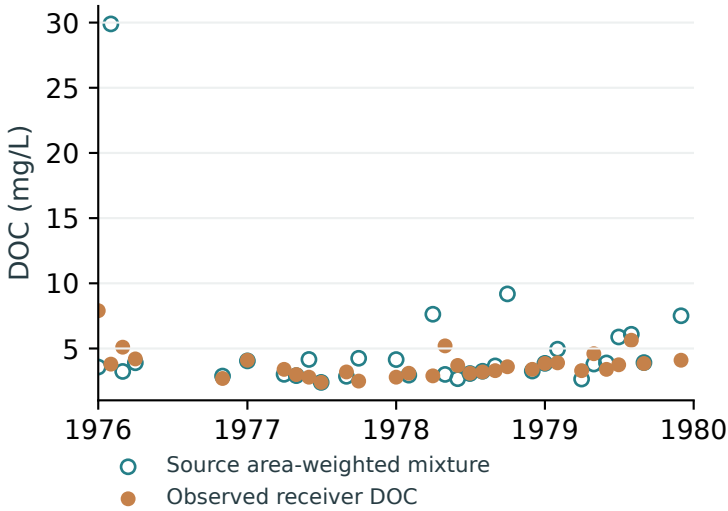

d Actual common sampling months
2 inputs; 32 months; median sample span 2 days

e Actual common sampling months
2 inputs; 28 months; median sample span 0 days

f Actual common sampling months
2 inputs; 31 months; median sample span 8 days

Colored channels: disjoint upstream gauged catchments; grey: uncovered; gold: source gauges; orange square: receiver gauge. Independent physical scale bars. Examples selected by coverage and calendar availability. Bottom panels show actual monthly points; no gap filling, continuous event curve or measured-flow weights.
