

DOC concentration, variability and seasonal response

Deduplicated source-training DOC cells (142 / 143 / 144); each eligible station contributes once.
Points: class medians; intervals: 95% station-bootstrap intervals (2,000 draws). Seasonal lines: station means with pointwise intervals.
Station eligibility: ≥ 12 DOC months and ≥ 6 calendar months. C-Q additionally needs ≥ 24 paired DOC-flow months.
